**\* Important Note**

This system is designed for the ultimate in high performance braking. The composition of the rotor/discs and pads are designed to deliver high performance braking in all ranges, however it must be noted that as a characteristic of these materials, some brake noise/squeal may result as well as a differing pedal/braking feel at lower brake temperatures vs. higher brake temperatures.

## Engine tuning, engine programme

Increased active safety with BRABUS high-performance engines for Mercedes-Benz cars, achieved by a considerable increase in torque and tractive power, featuring smooth idling and great serviceability.

- Prices for repairing, installation and other services are in principle chargeable with respect to the respective expense. However, manhours are chargeable with respect to the respective catalogue for working value in the event our respective price catalogue does not contain appropriate quotations. Respective decisive catalogue prices may be charged for employed parts.
- Price quotations in brochures and catalogues are only binding, provided such brochures and catalogues are still valid in the event of placing a purchase order and our confirmation of order does not state any deviations.

However, such compensation is limited to 5 % of the net price of the delayed or omitted delivery or performance, unless BRABUS is liable for damages caused by intentionally or gross negligence. If the respective contractual partner not being a consumer asserts claims for damages in lieu of performance, such claims are excluded, unless BRABUS is liable for damages caused by intentionally or gross negligence.
